## **COMPUTER**

### **Worksheet: Brief History of Computers**

#### **Reading Passage:**

Computers have a fascinating history that spans several decades. The evolution of computers can be traced back to the 19th century with the invention of mechanical calculators. However, the real breakthrough came in the mid-20th century with the invention of the electronic computer

#### **1. Mechanical Calculators (19th Century):**

In the 19th century, inventors like Charles Babbage and Ada Lovelace laid the groundwork for modern computing. Charles Babbage designed the "Analytical Engine," which is considered the first mechanical computer. Ada Lovelace, a mathematician, wrote the first algorithm intended for implementation on this machine, making her the world's first computer programmer.

#### **2. Electronic Computers (Mid-20th Century):**

The mid-20th century saw the birth of electronic computers. The first electronic general-purpose computer, called ENIAC (Electronic Numerical Integrator and Computer), was completed in 1945. It was massive, taking up an entire room, and was used primarily for military calculations.

#### **3. Personal Computers (1970s):**

The 1970s brought the era of personal computers. Companies like Apple and Microsoft started producing computers that were smaller, more affordable, and easier to use. The Apple II, released in 1977, and the IBM PC, released in 1981, were among the first successful personal computers.

#### **\*4. Internet and Digital Age (1990s - Present):**

The invention of the internet in the 1990s revolutionized the way we use computers. It connected computers worldwide, allowing for instant communication and access to information. Today, computers are not only faster and more powerful but also more compact and integrated into our daily lives through smartphones, tablets, and smart devices.

## Multiple Choice

1. Who designed the "Analytical Engine," considered the first mechanical computer?
  - [ ] Ada Lovelace
  - [ ] Steve Jobs
  - [ ] Charles Babbage
  - [ ] Bill Gates
2. What was the name of the first electronic general-purpose computer completed in 1945?
  - [ ] Apple II
  - [ ] IBM PC
  - [ ] ENIAC
  - [ ] Macintosh
3. Which company released the Apple II in 1977?
  - [ ] Microsoft
  - [ ] IBM
  - [ ] Apple
  - [ ] Google
4. Ada Lovelace was the world's first computer programmer.
  - [ ] True
  - [ ] False
5. The invention of the internet revolutionized computer usage in the 1980s.
  - [ ] True
  - [ ] False
6. The first electronic computer was called \_\_\_\_\_.
7. The 1970s brought the era of \_\_\_\_\_ computers.
8. The invention of the \_\_\_\_\_ connected computers worldwide.
9. The IBM PC was released in \_\_\_\_\_.
10. Computers today are more \_\_\_\_\_ and integrated into our daily lives.
