SUBJECT – SCIENCE

A. Read the following case-based passage and answer the following question.

Riya and Kabir went for a picnic in a forest with their teacher. They saw bees collecting nectar from flowers. The teacher explained that bees help flowers by carrying pollen from one flower to another. They also saw birds eating fruits and dropping seeds on the ground, which helps new plants grow.

Then they noticed a cactus plant growing in a dry area. Its leaves were changed into spines, and its thick stem stored water. Nearby, they saw a lotus plant floating in a pond with broad waxy leaves.

The teacher said that plants and animals depend on each other for food, shelter, oxygen, and seed dispersal. Different plants adapt to different places to survive.

Riya and Kabir learned that nature is connected like a big family.
